

Job offer: Embryologist for Research and Development (m/f/d)

Start of activity: As soon as possible
Working hours: Full-time (40 hours per week)
Fixed-term contracts: Unlimited

About us

VITROMED GmbH is a German medical device manufacturer based in Langenfeld and Jena. With our scientific expertise and precision, we produce high-quality products for assisted reproductive technology (ART) and have thus successfully established ourselves in a international clientele.

Your role and your path with us

To strengthen our team in Langenfeld, we are looking for a dedicated embryologist for research and development (m/f/d), who will drive our growth in the field of reproductive medicine with passion and expertise.

YOUR TASKS

-  They meet VITROMED's claim to ensure maximum protection of gametes and embryos due to expertise and best-in-class test systems for our products
-  You will be an expert in our existing and new products and processes and will be the contact person for questions from our global team of experts
-  You will carry out laboratory tests and validations and prepare technical documentation
-  You monitor market trends and identify opportunities for new product ideas and innovations.
-  Proactive, early and accompanying advice to the development department on regulatory issues
-  Be part of research and development projects and enjoy the feeling that your inventions are being used by people worldwide

WHAT WE WANT

-  A Bachelor's or Master's degree in Biology, Chemistry, Pharmacy, or a related life science, ideally combined with 2–5 years of professional experience as an Embryologist.
-  Alternatively, completed vocational training as a biology, chemical or medical laboratory assistant, BTA, CTA, MTA with relevant and proven professional experience
-  A hands-on, proactive mindset and the motivation to take ownership of your work
-  A genuine curiosity and willingness to continuously learn and develop in order to meet our customers' needs
-  Structured, creative, and independent way of working
-  A strong commitment to quality. Previous Quality Management experience is not required, but you should value and embrace quality-focused practices.
-  Proficiency in Microsoft Office and confidence in working with statistical tools and data analysis
-  Good written and spoken English; German language skills are an advantage
-  Willingness to travel occasionally (10% of working time)

WHAT WE OFFER

-  **We invest in your future:** We attach great importance to your professional development and therefore cover the costs of your annual, job-relevant training courses
-  **Modern working environment:** Look forward to your workplace in our newly renovated, modern offices. Your physical well-being is well taken care of: coffee, water and healthy snacks are available free of charge at any time
-  **Team & Culture:** Experience close cooperation with highly qualified, international colleagues in a corporate culture that values your initiative and commitment

- ⚙️ **Flexibility & provision:** Organize your working day individually within the given flextime and benefit from our company pension scheme
- ⚙️ **Commuting made easy:** Whether with your own car (free employee parking), relaxed by public transport or sporty with JobBike leasing - we support your way to work
- ⚙️ **Team spirit:** Enjoy the exchange with the entire workforce at our monthly team lunch

Please send your complete application documents including your cover letter, CV relevant certificates with details of your **salary expectations** and your **earliest availability**, to: career.lfeld@vitromed.com
Subject: " Embryologist R&D "
